Sections

Each page is made of **sections**. Select a section to set:

Field	Purpose
Section Name	Label in the content tree (for example “Ofertas”)
Anchor ID	Target for same-page links. `ofertas` makes the menu link `#ofertas` scroll to this section
Style	**Highlight**: light grey background. **Narrow**: content at most 720px wide on tablet and 960px on desktop

Sections have no automatic spacing. Add a **Spacer** block where you want vertical space.

Recommended Structure for the Home Page

#	Section Name	Anchor ID	Style	Contents (in order)
1	Announcement			Announcement Banner

#	Section Name	Anchor ID	Style	Contents (in order)

3	Fibra Gamer	`fibra-gamer`		Hero Banner
4	Promo & Legal			Spacer (40px), Partner Promo Banner, Legal Disclaimer, Spacer (40px)

In the editor a spacer is shown as a striped box; on the page it is empty space.

Text and Other Standard Components

- **Text** is edited directly on the page: double-click it to type, format, add lists and links. Its properties panel is empty, which is normal.
- To make a link look like a button, use the **Button** component, or make the link bold/italic in Text. Plain links stay links.
- **Title** and **Image** are edited in the properties panel.

Header and Footer

The header and footer are separate pages shared by all pages.

Header (`/content/vivo-gamer-poc/nav`):

1. Section 1: two **Image** components: Vivo logo (`logo-vivo.svg`, alt `Logo Vivo`) and Vivo Fibra logo (`logo-vivo-fibra.svg`, alt `Vivo Fibra`).

2. Section 2: a **Text** component with a **bulleted list**: `Ofertas` linked to `#ofertas`, `Vivo Fibra Gamer` linked to `#fibra-gamer`. Don't make the links bold or italic.
3. Publish the nav page.

On phones, the links are in the menu behind the hamburger icon (right side).

Footer (`/content/vivo-gamer-poc/footer`), one section:

1. **Text**: `Copyright © 2026 Vivo. Todos os direitos reservados.`
2. **Text**: the link `Política de Privacidade` → `https://www.vivo.com.br/a-vivo/informacoes-aos-clientes/centro-de-privacidade` (plain link).
3. **Image**: `logo-vivo-5g.svg`, alt `Logo Vivo 5G` (shown on the right).
4. Publish the footer page.

Images and Media

Topic	Guidance
Where	Upload to `/content/dam/vivo-gamer-poc` in AEM Assets
Selecting	Use the image field's asset picker in the properties panel
Alt text	Describe meaningful images; leave empty for purely decorative icons
Size limits	**SVG: at most 40 KB**. Images (PNG, JPG): 20 MB. PDF: 20 MB

Publishing fails with "Asset … exceeds the 40 KB size limit" when an SVG is too large. Ask a developer to optimize it, or use a PNG.

Publishing Workflow

Environment	Domain	Purpose
Preview	`main--vivo-gamer-poc--harithakrav.aem.page`	Check changes
Live	`main--vivo-gamer-poc--harithakrav.aem.live`	Production

Workflow: edit in the Universal Editor → **Publish** → check the preview/live page. When you change the header or footer, publish the nav or footer page too. New images are published together with the page that uses them.

Configuration Sheets

No configuration sheets (placeholders, redirects, bulk metadata) are set up for this site yet. If you need them, for example redirects after deleting a page, ask your administrator to create them.

Common Tasks

Task	Steps
Change a price	Open the page → select the Pricing Card → change **Option 1/2: Price** → Publish

Task	Steps
Add a plan	Select Pricing Cards → Add (+) → Pricing Card → fill in the fields → Publish
Add or remove an app	Select Included Apps → Add (+) → App, or select an App and delete it → Publish
Change the menu	Open the nav page → edit the Text list → Publish the nav page

Troubleshooting

Issue	Solution
Changes not visible on the site	Publish the page; wait 1-2 minutes; hard refresh (Ctrl+Shift+R)
Header or footer change not visible	Publish the nav or footer page, not only the home page
Text has no fields in the properties panel	Normal: double-click the text to edit it on the page
Menu links don't scroll to a section	Set the section's **Anchor ID** (`ofertas`, `fibra-gamer`)
An app change doesn't show in the cards in the editor	Reload the editor
A new link or app looks empty	Fill in its fields; empty items show a placeholder in the editor only
CTA bar not sticky	The CTA Bar must be in the last section of the page
Publishing fails because of an SVG	SVGs must be 40 KB or smaller
Page title shows "AEM Boilerplate"	Set **Title** in the page properties and publish
